

***Glomar Minerals Welcomes Continued UK Sponsorship of UK Seabed Resources***

*12/12/2025*

*Glomar Minerals is pleased to acknowledge His Majesty's Government's decision to maintain its sponsorship of UK Seabed Resources, holder of two ISA exploration contracts in the Clarion-Clipperton Zone.*

*This decision follows Glomar Minerals' acquisition of UK Seabed Resources from the bankruptcy estate of Loke Marine Minerals earlier this year. Glomar Minerals is committed to ensuring continuity and responsibility in managing these contracts, with a strong focus on advancing scientific knowledge and environmental stewardship.*

*We appreciate this continued sponsorship, which enables us to progress our work in collecting critical environmental and resource data. Our priority remains closing knowledge gaps and contributing to a robust scientific understanding of the deep-sea environment.*

*Glomar Minerals will continue to work transparently and collaboratively with stakeholders to ensure that all activities are conducted in line with international standards and best practices.*
